Overview

ArtfulBits Email as Attachment allows sending one or more documents as attachments directly from SharePoint library. To make sending multiple documents more convenient, they can be compressed into a single archive file before sending. Additionally, ArtfulBits Email as Attachment provides a useful feature that is downloading compressed files directly to file system, without sending.

Display Send as Attachment action in item Drop-Down Menu and in ribbon (<i>in IE</i>)	✓	✓	✓
Easy to configure	✓	✓	✓
Language pack support (desired localization can be added by request)	✓	✓	✓

Why ArtfulBits Email as Attachment?

Out-of-the-box SharePoint offers only sending link to a file. With Email as Attachment it is not necessary to download files to the local disk in order to send out. Just select target documents from Document Library and click "Send as Attachment" button in ribbon or list item menu. Outlook's New Mail form will be opened automatically with these documents attached. Sending lots of attached documents may be inconvenient in certain cases, so ArtfulBits Email as Attachment provides a possibility to compress those into a single archive and send. Just click "Send as Archive" button. It is also possible to download compressed documents without sending by clicking "Download as Archive" button.

How to Use

To use ArtfulBits Email as Attachment click on the buttons in document library ribbon or in document drop-down menu → Advanced Settings (*notice that Send as Archive and Send as Attachment buttons are active only in IE*):

1. "Send as attachment" button will open Outlook New Mail form and attach selected documents to the letter.
2. "Send as archive" button will do the same thing, except for compressing selected documents into a single archive file.
3. "Download as archive" button will compress selected documents into an archive and download it into your file system.

Configuration

It is required to activate "ArtfulBits Email as Attachment" site collection feature to use Email as Attachment.

 ArtfulBits Email as Attachment
Sends documents as attachments. Deactivate Active

In order to enable **Send as Attachment** feature for Document library, go to **Library Settings** and select **Send as Attachment settings** link under **Communications** tab:

	<input checked="" type="radio"/> Yes <input type="radio"/> No

Click **Save** button.

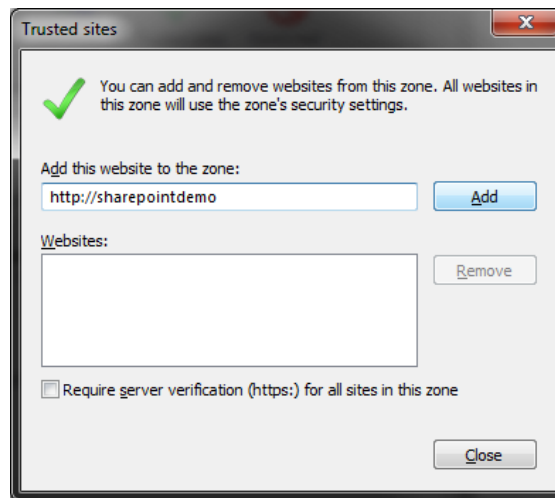

Internet Explorer Settings

By default IE prevents integration with unsafe controls. It is recommended to add current SharePoint portal to trusted sites security zone and enable unsafe ActiveX controls.

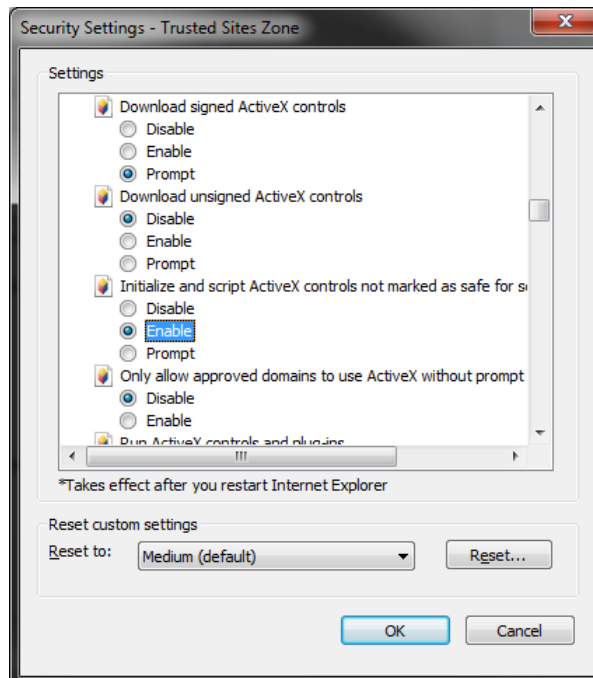

- 1) Open Security Settings dialog (*Tools* → *Internet Options* → *Security*)

2) Add current site to trusted Sites (*Trusted sites* → *Sites* → check Web URL and click *Add*):

3) Allow unsafe ActiveX (*Custom level...* → *ActiveX controls and plug-ins* section → choose *Prompt* or *Enable* under *Initialize and script ActiveX controls not marked as safe for scripting* box.)
